

AMENDMENTS TO THE CLAIMS:

Without prejudice or disclaimer, this listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-95 (Cancelled).

Claim 96 (Currently amended): A method of providing intense color to a composition chosen from one or more of mascara, an eyeliner, a foundation, a lipstick, a blusher, a make-up removing product, a make-up product for the body, an eyeshadow, a face powder, a concealer, a shampoo, a conditioner, an anti-sun product, a care product for skin, a care product for lips, and a care product for hair comprising including in said composition:

(i) at least one heteropolymer chosen from ethylenediamine/stearyl dimer tallate copolymer and ethylenediamine/stearyl dimer dilinoleate copolymer~~comprising a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and~~

(ii) at least one coloring agent,

wherein said at least one heteropolymer is included in said composition in an amount effective to provide said intense color.

Claim 97-141 (Cancelled).

Claim 142 (Previously presented): The method according to claim 96, wherein said composition further comprises at least one liquid fatty phase.

Claims 143-166 (Cancelled).

Claim 167 (Previously presented): The method according to claim 96, wherein said composition further comprises at least one polysaccharide resin.

Claims 168-169 (Cancelled).

Claim 170 (Previously presented): The method according to claim 96, wherein said composition further comprises at least one film former.

Claims 171-174 (Cancelled).

Claim 175 (Previously presented): The method according to claim 96, wherein said composition further comprises at least one fatty alcohol.

Claims 176-202 (Cancelled).

Claim 203 (Currently amended): A method of providing intense color to a cosmetic composition, comprising including in said cosmetic composition:

(i) at least one heteropolymer chosen from ethylenediamine/stearyl dimer tallate copolymer and ethylenediamine/stearyl dimer dilinoleate copolymer; polyamide-polymers of formula (I):

in which:

~~n is an integer which represents the number of amide units such that the number of ester groups present in said at least one polyamide polymer ranges from 10% to 50% of the total number of all ester groups and all amide groups comprised in said at least one polyamide polymer;~~

~~R¹, which are identical or different, are each chosen from alkyl groups comprising at least 4 carbon atoms and alkenyl groups comprising at least 4 carbon atoms;~~

~~—R², which are identical or different, are each chosen from C₄ to C₄₂ hydrocarbon-based groups with the proviso that at least 50% of all R² are chosen from C₃₀ to C₄₂ hydrocarbon-based groups;~~

~~—R³, which are identical or different, are each chosen from organic groups comprising atoms chosen from carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms, with the proviso that R³ comprises at least 2 carbon atoms; and~~

~~—R⁴, which are identical or different, are each chosen from hydrogen atoms, C₄ to C₁₀ alkyl groups and direct bonds to at least one group chosen from R³ and another R⁴ such that when said at least one group is chosen from another R⁴, the nitrogen atom to which both R³ and R⁴ are bonded forms part of a heterocyclic structure defined in part by R⁴-N-R³, with the proviso that at least 50% of all R⁴ are chosen from hydrogen atoms; and~~

(ii) at least one coloring agent,

wherein the at least one heteropolymer is included in said cosmetic composition in an amount effective to provide said intense color.

Claim 204-205 (Cancelled).

Claim 206 (Previously presented): The method according to claim 203, wherein said cosmetic composition is a nail composition.
